

this template is reduced 75% to 9.65" wide x 4.35" high to allow printing on standard paper

*imageglow*<sup>®</sup> candles

template for lantern candle

---

the finished size of artwork required to wrap around the lantern is 12.875" wide x 5.8125" high  
we will resize the artwork of the winning entry or you can provide us with with actual size artwork

please note these dimensions are in inches | final artwork size in metric is 32.7cm x 14.75cm

## Imageglow® Design Challenge

### Instructions

- Entrants must be age 18 or older.
- The design must be your own, original design.
- Limit of six designs can be submitted per person.
  
- Create your artwork by drawing, hand painting, etc., directly on the template, or on art paper cut to size using the template as a guide. When done, scan your artwork or take a quality, up-close photo of it, and save as a .jpg file. Then upload to the Challenge Entry form.
- **OR**
- Create your design in a computer graphics program like Photoshop, Illustrator or Indesign. When done, save your artwork as .jpg file, then upload to the Challenge Entry form.
  
- The template is reduced to 75%, to allow printing on standard paper.
- We will produce the winning artwork at finished size 12.875" wide x 5.8125" high; finished size in metric is 32.7cm x 14.75cm.
- Winning design becomes the property of Imageglow®.
- Winner's six candles must be in the same design/color.

## Imageglow® Design Challenge

### Design Tips

#### *Color*

- When selecting your color palette, remember that the color of the flame is quite warm and will “shift” colors.
- Warm colors tend to look best (gold, yellow, red, orange, rose, etc.)
- The candle base wax color can be white or ivory depending on the design + desired effect (see current designs on the Web site for examples: <http://imageglowcandles.com/4x6lanternstylecandles.aspx> )
- There is no limit to the colors you can use but we cannot achieve true metallics.
- Pantone colors can be provided as a guideline but we cannot guarantee an exact color match; and the colors will visually shift when backlit by the flame.

#### *Wrap and Pattern*

- The design will wrap around the candle and not all of the design will be visible at once.
- Overall repeat patterns work well.
- You can also create a 'back' and 'front' which can be the same pattern/image.
- There will be a seam at the back or side, you can either create a pattern that lines up, or leave a 1/4" to 1/2" space at the end of the design (note – does not matter for some patterns such as vertical stripes).
- The Designer's name can be included on the candle as a signature (Recommended along the seam vertically or at the base horizontally).
